WITH APU DISCONNECTED.

\*13TH RUN APU DISCONNECTED.

\*14TH RUN APU DISCONNECTED/PULLED HEAVY  
FLATBED LOADS LOWERING OVERALL PERFORMANCE.

## Next Generation *C10* Coming Soon.

Cumberland built the RX-C10 as the prototype to what would become the C10 Edition. It was designed with one goal in mind; develop, build, and sell a truck capable of achieving 10 miles per gallon fuel economy. Make no mistake, this is no "super" truck of the future. This is a real world truck, designed to run 65 MPH, haul freight and consistently deliver the best fuel economy available. **Learn more today...**
